# DECENTRALIZATION IN INDONESIA

## LOCAL GOVERNANCE SYSTEM

All sectors are being decentralized to the local government except: foreign politics, defense, security, judiciary, monetary and fiscal and religion.

Provincial: mining, marine, forestry and senior high school

### Local Government Association in Indonesia:

- LGA is arranged in Law 23/2014 in a clausulae 364 (9)
- Each LGA is registered legally
- Independent, non government and non profit organization
- Membership: automatically
- Financial: membership fees (yearly with city categories)

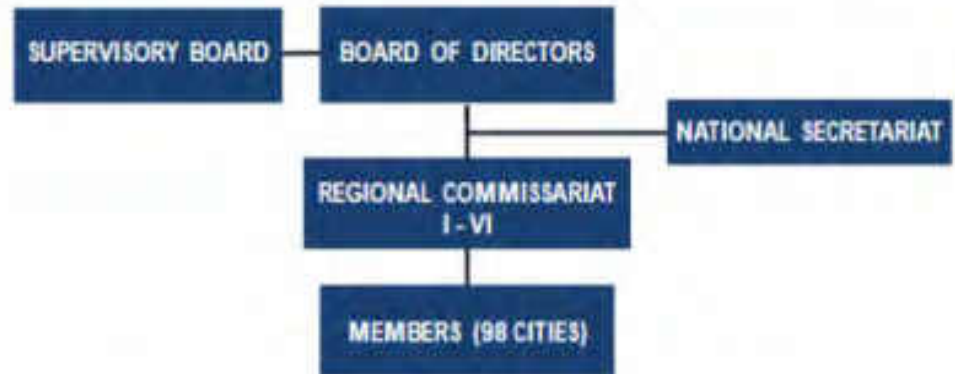

## Association of Indonesia Municipalities

- Established on 25 May 2000 in Surabaya
- Number of members is 98 cities (all cities in Indonesia)
- Organisation Structure:

- The Chairwoman of Board:
  - Mayor of South Tangerang, Airin Rachmi Diany

### Roles:

- As a **representative of local government** (city government) to deal with the government or other parties;
- Guiding the local autonomy policies and implementation;
- **Facilitating the member's services** such as capacity building, advocacy, and information and data dissemination;
- **Exchange and transfer** knowledge among the members and with others relevant parties;
- **Information center** of local government (city government)

# Challenges

## **EXTERNAL**

- Urbanisation
- Poverty
- Environmental Quality
- Globalisation
- Overlapping Regulation/Policy On Regional Autonomy
- Local Government Capacity
- Unbalanced Cities Growth

## **INTERNAL**

- Member's Participation Dynamic
- Regional Commissariat's Roles Not Yet Optimal
- Human Resources
- Sustainability Financial

**AIRIN RACHMI DIANY**  
APEKSI's Chairwoman  
Mayor of South Tangerang

# DELAPAN LANGKAH TRANSFER INOVASI PELAYANAN PUBLIK

APEKSI cooperates with the program Transformasi Administrasi-Peningkatan Inovasi (TRANSFOMASI) or Administrative Transformation-Enhancing Innovation carried out by GIZ (Gesellschaft fuer Internationale Zusammenarbeit GmbH) on behalf of the Ministry The German Federal for Economic Cooperation and Development compiled a manual of Delapan Langkah Transfer Inovasi Pelayanan Publik or Eight Steps to Transfer Public Service Innovations.

This manual aims to make it easier local governments to transfer innovation between regions independently.

# Best Practice Documentations

- Waste to energy – Malang City (11), Kendari (10), Pekalongan (10), Biodiesel-Bogor (10)
- Energy efficient – Clean, Green & Blue-Palembang & Probolinggo (6)

All document in Digital Library/Knowledge Sharing at [apeksi.xyz/bestpractice](http://apeksi.xyz/bestpractice)

*Green Infrastructure development is important in achieving Sustainable Development Goals (SDGs). Because, only with green or environmentally friendly infrastructure, sustainable development can be achieved. [Sri Mulyani, IMF-WB, Bali 2018]*

Green Infrastructure coverage:

- Improved water quality
- Improved air quality
- Preservation of the natural habitat of living things
- Electricity savings

**Activities:**

- **Climate Change Working Group [since 2012]**
- **Knowledge Management Forum [yearly, since 2014]**
- **Localise SDGs [since 2018]**
- **FGD, Etc.**

Issues

- Climate Change
- Low Emission
- Waste
- Renewable energy
- Energy saving
- Financing
- Eco-friendly architecture
- Eco-tourism
- Ecology in the city
- Urban park
- Green roof
- Urban farming
- Rooftop farming
- Food self-sufficiency House
- Green architecture
- Green wall
- Sloping green

# SURABAYA CITY

East Java

## 2018

- The area of green open space for the public has reached 21.79% or equal to 7,290.53 hectares
- Government-owned land to become a city park
- Land around landfills (TPA) that are transformed into city parks.

**Compost House**

28 unit compost house, made to improve the structure of the soil so that it can absorb water properly and also able to produce an electrical energy source that can be used by residents around the landfill about 2KW – 6KW

**Benowo Plant:** 1,300-1,500 tons of waste and produces 2 megawatts of electricity per day

# MALANG CITY

## East Java

### 3G – Glintung (village) Go Green

Before 2012

- Slum area
- Submerged in water when rain

Now

- No more dirty impression
- All seen was a refreshing green landscape
- Every yard of the house is decorated by various kinds of plants
- Vertically with hydroponic techniques for narrow alley or do not have enough land

GEMAR (Gerakan Menabung Air) or The Water Saving Movement. Save water during the rainy season.
