Learning from Dar es Salaam

Expert exchange on experiences
with revolving funds with experts
from Leipzig (Germany) and Lviv
(Ukraine) in August 2015

OUR APPROACH

Connective Cities follow-up support for project ideas

Direct follow-up through Connective Cities: support, advice, international contacts

Information and virtual networking through our website

Expert exchanges for better project planning: using the Connective Cities expert pool

Information on funding opportunities: external funding opportunities and direct contact to funding partner institutions

Expert exchange

Virtual Networking

CONNECTIVE CITIES

INTERNATIONAL COMMUNITY OF PRACTICE FOR SUSTAINABLE URBAN
DEVELOPMENT

GOOD URBAN GOVERNANCE

Subsidiarity, equality,
efficiency, transparency,
accountability, popular
participation and security:
these principles lie at the
heart of good urban governance and sustainability
in cities.

INTEGRATED URBAN DEVELOPMENT

Participation and urban
planning, urban resilience
in times of climate
change, the creation of
human and equitable
cities, innovations in urban transport and mobility -
all these issues are important fields of integrated
urban development.

LOCAL ECONOMIC DEVELOPMENT

Urban economic
development is about
making cities more
attractive, fostering
investment, reducing
environmental impact, indirectly creating jobs and
generating tax revenue that can be used to
finance local government services.

EXPERT POOL

WE PROCURE KNOW-HOW!

In international cooperation practical experience counts! Professional know how on sustainable urban development is increasingly being asked for!

In order to achieve this, Connective Cities has developed an expert database in which just under 70 municipal practitioners are currently registered who have offered to participate in international assignments in projects on sustainable integrated urban development, Good Urban Governance and local economic development to provide their practical experience from German cities.

How does it work?

The expert database installed in the Connective Cities web portal provides information in brief from municipal experts. Respective subject expertise can be filtered via the search criterion "subject area". Here, under headwords ranging from "citizens' participation" to "managing administration", you can find municipal expertise. Via the "search" function, you can find and contact experts in a wide range of specialist areas.

If you are keen to cooperate with a municipal expert, you can either fill in the corresponding request form in the web portal or directly address your inquiry to the Connective Cities team (info@connective-cities.net).

We can provide further about the expert information and support you in establishing contacts.

If you would like to become active in the international field of sustainable urban development, you can [register as a municipal expert](#).
