

## Good Practice Example: Frente Nacional de Prefeitos FNP

## Project “Strengthening the network *Estratégia ODS*”

The project aims to strengthen *Estratégia ODS*, a multi-sector network of organizations whose main goal is to contribute to the implementation of the SDGs in Brazil. With local governments, the project supports the revision and elaboration of planning instruments oriented by the SDGs. As for now, 73 cities have achieved the expected results.

Duration: Oct/18 to Oct/21

# 1. Institutional setting

## Federal government

Project

## 2. Starting point/Project goal

### Challenges:

- Dissemination and implementation of the SDGs in Brazil
- Increasing inequality
- Decline of participation forums

**Main objective:** contribute to the effective implementation of the SDGs in Brazil

Focused on **reducing inequalities** (gender, race, ethnicity and generational)

**Integrated work** among public management bodies at local level with civil society participation

Promotion of **multi-sector** approach to the achievement of the SDGs (joint initiatives, dialogues)

# 3. Approach

**Local planning and the SDGs:** methodology for the revision and elaboration of multiannual plans

- Who are the key actors to be engaged? Mayor, secretariats of planning, finance, internal control/audit bodies
- Are there any local policies and/or regulations related to the SDGs?
- Creation of a working group or local commission
- Which public bodies contribute to the achievement of each SDG target?
- Which of the existing programs and actions contribute to the achievement of each SDG target?
- Which relevant targets the government is not tackling?

for Childhood  
and Adolescence

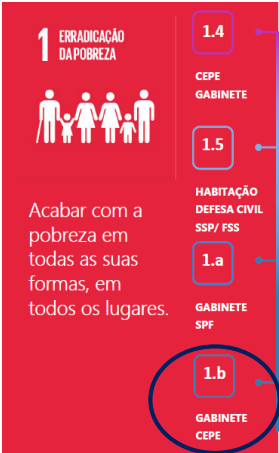

ODSlab: solutions  
for complex  
problems

# 4. Outputs

73 cities achieved the results

## Municipality of Atibaia (SP)

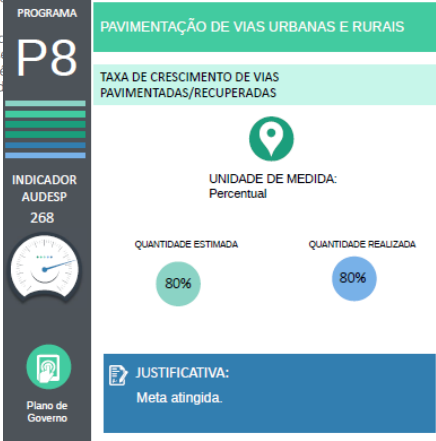

Local public bodies identified to the target

Até 2030, garantir que todos os homens e mulheres, particularmente os pobres e vulneráveis, tenham direitos iguais a recursos econômicos, bem como acesso a serviços básicos, propriedade e controle sobre a terra e a outras formas de propriedade, herança, recursos naturais, novas tecnologias apropriadas e serviços financeiros, incluindo microfinanças

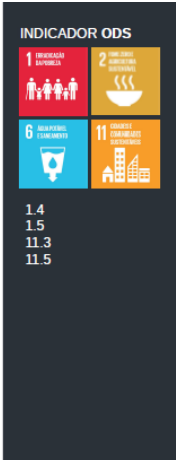

Até 2030, construir a resiliência dos pobres e daqueles em situação de vulnerabilidade, e reduzir a exposição e vulnerabilidade destes a eventos extremos relacionados com o clima e outros choques e desastres econômicos, sociais e ambientais

Garantir uma mobilização significativa de recursos a partir de uma variedade de fontes, inclusive por meio do reforço da cooperação para o desenvolvimento, de forma a proporcionar meios adequados e previsíveis para que os países em desenvolvimento, em particular os países de menor desenvolvimento relativo implementem programas e políticas para acabar com a pobreza

Criar marcos políticos internacionais, com base em evidências, para apoiar os pobres e sensíveis a gênero, e ações de erradicação de pobreza

Public program and the related SDGs and targets

## Municipality of Francisco Morato (SP)

Great involvement of the mayor

Workshops

Alignment of all the municipal plans

Local commission

# 5. Lessons learnt

## Challenges

- No guidance for local governments nor national coordination
- Local technical teams are willing to work with the SDGs, but the involvement of the leaders (mayors and secretaries/heads of department) is usually low
- Low integration among municipal secretariats
- Lack of indicators adapted to the local level

## Key points to successful implementation of SDGs and sustainability of the results

Proper involvement of the mayor  
Visibility and recognition of the work of LGs  
Exchange of experiences  
Strengthening of a network of municipalities

# 6. Follow up

## National context
