“The City of choice of to invest, work and live in”

Last Action Plan

- Political lobbying in support of the Integrated Solid Waste Management Plan.
- Develop a sustainable Solid Waste Management fee model.
- Increase overall Resource Recovery to 15% in the next 3 years.
- Behaviour and attitude change towards 100% collection coverage in the City.
- Increase stakeholder participation in Resource Recovery.

Progress achieved

- Enactment of the Nairobi City County Solid Waste Management Act.
- Promotion of waste separation at source for resource recovery.
- Promotion of subscription for waste collection and transportation.
- Increased awareness creation; national TV production
- Increased stakeholder engagement in resource recovery.

Project Prioritization

- Enactment of the Solid Waste Management (SWM) Bill.
- Expected benefits of the Solid Waste Management Act :
 - Targets the whole City's populace.
 - Sustainability of SWM revenue.
 - Environmental conservation
 - Healthy environment
 - Job opportunities through promotion of separated waste streams.
 - Promotes public and private participation.
 - Improved working environment for waste recyclers in terms of health and safety considerations; and cleaner conditions achieved by separated waste streams.

The Nairobi City County Solid Waste Management Act1

Waste collection frequency and containers

Waste collection and transportation shall be conducted **2 times a week** or more based on request.

The collection system is designed to support the '3R and further facilitate the establishment of Intermediate Treatment Plant'. In this connection, waste will be separated at source and contained in three different color coded containers or liner bags as highlighted below:

Green line: Organic waste **Blue line:** Recyclable waste **Brown line:** Others

Information of the Franchisee (Name, Address, Phone number) must be printed clearly on the container/ liner bag. Dimensions of the liner bag will be (100x70) cm while containers sizes will vary according to demand of the generators. For those who have subscribed to the franchisee, **No collection shall be made if the waste is not contained in the recommended containers/liner bags.** Also, **non-segregated waste shall not be collected.**

Waste charge

A standard waste charge has been advised by the Nairobi City County Government based on the prevailing economic circumstances and expectations of cross-subsidy.

HOW TO SEPARATE YOUR WASTE

ORGANIC

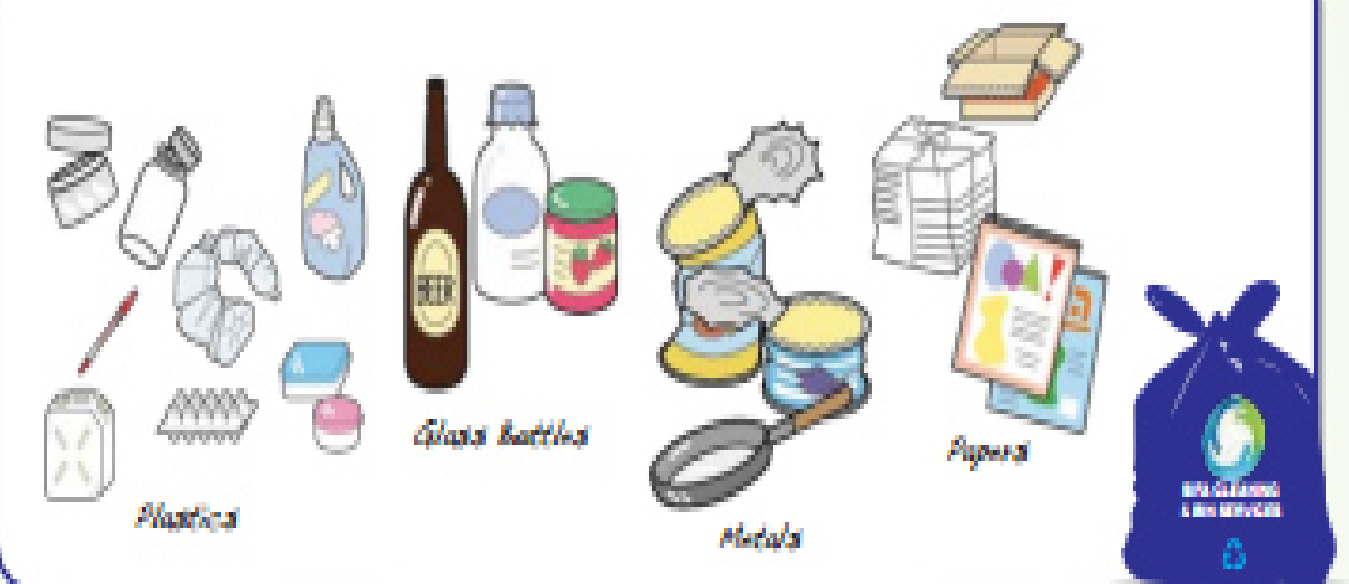

We provide you with three colour coded liner bags; Green, Blue and Brown.

It is your **RESPONSIBILITY** to separate your waste as I show you with examples here. Let's make our environment **CLEANER & HEALTHIER** together!!!

If there is anything unclear, don't hesitate to contact NCC/SIFA. We are always happy to help you for a better environment
