

RAMALLAH MUNICIPALITY

Build the resilience of city & community through shaping creative spaces and new gatherings

- Engage and empower citizens
- Reduce inequalities

1. Institutional setting

- Sustainable Development city Framework
 - Urbanization of city neighborhoods
 - Building the resilience of city, community, and systems
- mobilize public spaces to bring people together, to celebrate their culture and social beliefs.
- create and shape spaces to induce social change i.e reduce inequalities, gender equality

2. Starting point/Project goal

3. Approach

- City planning interventions
- Reservation of old town
- Regeneration of old town
- organize cultural festivals
- license new crafts in the old town
- Plan a new touristic trail

4. Outputs

BEFORE

AFTER

5. Lessons learnt

- Stakolder consolidation to integrate efforts
- community engagement in thinking, planning, and implementation process.
- screen-out stakeholders and assign needs to resources accordingly
- smaller ideas – bigger scale impact

6. Follow up

- the project to be developed to respond to demand trends and changing lifestyle of citizens
- Reach out to all community groups
- implement the project in other neighborhoods in the city
- Build partnerships to add-in new techniques and value to the project to amplify the benefit

Project

Build the resilience of city & community through shaping creative spaces and new gatherings

Challenge

- sustainable financing
- old infrastructure that challenges our response to increasing demand on urban and public services
